

Raven Rock Summer Youth Programs

With

The Red Mill Museum Village

Looking for something fun for your kids to do this summer?? Look no further! Raven Rock Summer Programs LLC, and the Red Mill Museum Village have JUST the programs that your kids will love!

Our Nature Program-

Our nature program combines team building with all the adventures that an aspiring environmentalist could possibly imagine. From exploring the riverbank, to hands on interactive workshops such as engineering, live reptile shows, or even spotting wildlife on the property, there is always a new adventure around every corner. The children even get to go kayaking on the South branch river right off the Red Mill property!

Our History Program-

Our history program brings the pages of your children's history books alive! They will learn about history in a way they never have before, as they time travel and become part of it. With the help of reenactors, our historical facility, and many fun activities, your children will be traveling daily into the colonial era and where they will even join the Revolutionary militia. They'll actually enjoy putting those electronics down and learn how people lived before them!
